

The JAAGO students of Class 1 and K.G. II demonstrated commendable entrepreneurial skills with their PowerPoint presentation!

It all started with these classes not having enough funds to buy a pushpin board and locker for the classroom. After a whole lot of brainstorming, they came up with a business model that could be a solution to such funding issues.

The big day came for them when they presented their model in front of Korvi Rakhsand. They pitched that they will hand make cards . The profit will go towards the purchase of necessary classroom material! This surprising self fending entrepreneurial spirit amongst our students is very rewarding for every JAAGO member who work towards making a bright future for them!
